

Federal Communications Commission

§ 54.305

[Return on Investment attributable to COE Category 3—Included in Account 7300—Account 7500—Account 7210] × [Federal Income Tax Rate (1—Federal Income Tax Rate)].

* * * * *

§ 54.303 Long term support.

(a) Beginning January 1, 1998, an eligible telecommunications carrier that participates in the association Common Line pool shall receive Long Term Support.

(b) Long Term Support shall be calculated as prescribed in this paragraph.

(1) To calculate the unadjusted base-level of Long Term Support for 1998, the Administrator shall calculate the difference between the projected Common Line revenue requirement of association Common Line tariff participants projected to be recovered in 1997 and the sum of end user common line charges and the 1997 projected revenue recovered by the association Carrier Common Line charge as calculated pursuant to § 69.105(b)(2) of this chapter.

(2) To calculate Long Term Support for calendar year 1998, the Administrator shall adjust the base-level of Long Term Support calculated in paragraph (b)(1) of this section to reflect the annual percentage change in the actual nationwide average unseparated loop cost per working loop as filed by the Administrator in the previous calendar year, pursuant to § 36.622 of this chapter.

(3) To calculate Long Term Support for calendar year 1999, the Administrator shall adjust the level of support calculated in paragraph (b)(2) of this section to reflect the annual percentage change in the actual nationwide average unseparated loop cost per working loop as filed by the Administrator in the previous calendar year, pursuant to § 36.622 of this chapter.

(4) Beginning January 1, 2000, the Administrator shall calculate Long Term Support annually by adjusting the previous year's level of support to reflect the annual percentage change in the Department of Commerce's Gross Domestic Product-Consumer Price Index (GDP-CPI).

(5)(i) Beginning July 1, 2002, each carrier will be eligible to receive LTS equal to the lesser of:

(A) The LTS for which the carrier would be eligible pursuant to paragraph (b)(4) of this section, or

(B) Its common line revenue requirement as calculated in accordance with part 69 of this chapter, minus:

(1) The study area revenues obtained from end-user common line charges at their allowable maximum as determined by §§ 69.104(n) and 69.104(o) of this chapter;

(2) The carrier common line charge revenues to be phased out pursuant to § 69.105 of this chapter;

(3) The special access surcharges pursuant to § 69.114 of this chapter; and

(4) The line port costs in excess of basic analog service pursuant to § 69.130 of this chapter.

(ii) Under no circumstance shall a carrier have LTS that is less than zero.

(iii) In calculating an LTS amount pursuant to paragraph (b)(5)(i)(B) of this section, the Administrator shall use data filed pursuant to § 54.903 of this chapter.

[63 FR 2128, Jan. 13, 1998; 63 FR 33586, June 19, 1998, as amended at 67 FR 42506, June 24, 2002]

§ 54.305 Sale or transfer of exchanges.

(a) A carrier that acquires telephone exchanges from an unaffiliated carrier shall receive universal service support for the acquired exchanges at the same per-line support levels for which those exchanges were eligible prior to the transfer of the exchanges. A carrier that has entered into a binding commitment to buy exchanges prior to May 7, 1997 will receive support for the newly acquired lines based upon the average cost of all of its lines, both those newly acquired and those it had prior to execution of the sales agreement.

(b) Transferred exchanges in study areas operated by rural telephone companies that are subject to the limitations on the transfer of high-cost universal service support in paragraph (a) of this section may be eligible for a safety valve loop cost expense adjustment based on the difference between a rural incumbent local exchange carrier's index year expense adjustment and subsequent year expense adjustments for the acquired exchanges.

Safety valve loop cost expense adjustments shall only be available to rural incumbent local exchange carriers that, in the absence of restrictions on the transfer of high-cost support in § 54.305(a), would qualify for high-cost loop support for acquired exchanges under § 36.631 of this chapter.

(c) The index year expense adjustment for acquired exchange(s) shall be equal to the rural incumbent local exchange carrier's high-cost loop cost expense adjustment for acquired exchanges calculated at the end of the company's first year operating the acquired exchange(s). The index year expense adjustment for the acquired exchange(s) shall be established through cost data submitted in accordance with §§ 36.611 and 36.612 of this chapter and shall be calculated in accordance with § 36.631 of this chapter. For carriers establishing an index year for acquired exchanges pursuant to § 36.611 of this chapter, the index year for the acquired exchange(s) shall commence at the beginning of the next calendar year after the transfer of said exchanges. For carriers establishing an index year for acquired exchanges pursuant to § 36.612 of this chapter, the index year for the acquired exchange(s) shall commence at the beginning of the next calendar quarter after the transfer of said exchanges. The index year expense adjustment for rural telephone companies that have operated exchanges subject to this section for more than a full year on the effective date of this paragraph shall be based on loop cost data submitted in accordance with § 36.612 of this chapter for the year ending on the nearest calendar quarter following the effective date of this paragraph. At the end of each subsequent year, a loop cost expense adjustment for the acquired exchanges will be calculated pursuant to § 36.631 of this chapter and will be compared to the index year expense adjustment. A rural incumbent local exchange carrier's subsequent year expense adjustments shall end on the same calendar quarter as its index year expense adjustment. If acquired exchanges are incorporated into an existing rural incumbent local exchange carrier study area, the rural incumbent local exchange carrier shall exclude

costs associated with the acquired exchanges from the costs associated with its pre-acquisition study area in its universal service data submissions filed in accordance with §§ 36.611 and 36.612 of this chapter. Such excluded costs shall be used to calculate the rural incumbent local exchange carrier's safety valve loop cost expense adjustment.

(d) Up to fifty (50) percent of any positive difference between the subsequent year loop cost expense adjustment and the index year expense adjustment will be designated as the study area's safety valve loop cost expense adjustment and will be available in addition to the amounts available to the study area under § 54.305. In no event shall a study area's safety valve loop cost expense adjustment exceed the difference between the carrier's uncapped study area loop cost expense adjustment calculated pursuant to § 36.631 of this chapter and transferred support amounts available to the acquired exchange(s) under paragraph (a) of this section. Safety valve support shall not transfer with acquired exchanges.

(e) The sum of the safety valve loop cost expense adjustment for all eligible study areas operated by rural telephone companies shall not exceed five (5) percent of the total rural incumbent local exchange carrier portion of the annual nationwide loop cost expense adjustment calculated pursuant to § 36.603 of this chapter. The five (5) percent cap on the safety valve mechanism shall be based on the lesser of the rural incumbent local exchange carrier portion of the annual nationwide loop cost expense adjustment calculated pursuant to § 36.603 of this chapter or the sum of rural incumbent local exchange carrier expense adjustments calculated pursuant to § 36.631 of this chapter. The percentage multiplier used to derive study area safety valve loop cost expense adjustments for rural telephone companies shall be the lesser of fifty (50) percent or a percentage calculated to produce the maximum total safety valve loop cost expense adjustment for all eligible study areas pursuant to this paragraph. The safety valve

loop cost expense adjustment of an individual rural incumbent local exchange carrier also may be further reduced as described in paragraph (d) of this section.

(f) Once an acquisition is complete, the acquiring rural incumbent local exchange carrier shall provide written notice to the Administrator that it has acquired access lines that may be eligible for safety valve support. Rural telephone companies also shall provide written notice to the Administrator of when their index year has been established for purposes of calculating the safety valve loop cost expense adjustment.

[62 FR 32948, June 17, 1997, as amended at 66 FR 30087, June 5, 2001]

§ 54.307 Support to a competitive eligible telecommunications carrier.

(a) *Calculation of support.* A competitive eligible telecommunications carrier shall receive universal service support to the extent that the competitive eligible telecommunications carrier captures the subscriber lines of an incumbent local exchange carrier (LEC) or serves new subscriber lines in the incumbent LEC's service area.

(1) A competitive eligible telecommunications carrier serving loops in the service area of a rural incumbent local exchange carrier, as that term is defined in § 54.5 of this chapter, shall receive support for each line it serves in a particular service area based on the support the incumbent LEC would receive for each such line, disaggregated by cost zone if disaggregation zones have been established within the service area pursuant to § 54.315 of this subpart. A competitive eligible telecommunications carrier serving loops in the service area of a non-rural incumbent local exchange carrier shall receive support for each line it serves in a particular wire center based on the support the incumbent LEC would receive for each such line. A competitive eligible telecommunications carrier serving loops in the service area of a rate-of-return carrier shall be eligible to receive Interstate Common Line Support for each line it serves in the service area in accordance with the formula in § 54.901.

(2) A competitive eligible telecommunications carrier that uses switching purchased as unbundled network elements pursuant to § 51.307 of this chapter to provide the supported services shall receive the lesser of the unbundled network element price for switching or the per-line DEM support of the incumbent LEC, if any. A competitive eligible telecommunications carrier that uses loops purchased as unbundled network elements pursuant to § 51.307 of this chapter to provide the supported services shall receive the lesser of the unbundled network element price for the loop or the incumbent LEC's per-line payment from the high-cost loop support and LTS, if any. The incumbent LEC providing non-discriminatory access to unbundled network elements to such competitive eligible telecommunications carrier shall receive the difference between the level of universal service support provided to the competitive eligible telecommunications carrier and the per-customer level of support that the incumbent LEC would have received.

(3) A competitive eligible telecommunications carrier that provides the supported services using neither unbundled network elements purchased pursuant to § 51.307 of this chapter nor wholesale service purchased pursuant to section 251(c)(4) of the Act will receive the full amount of universal service support that the incumbent LEC would have received for that customer.

(4) A competitive eligible telecommunications carrier that provides the supported services using neither unbundled network elements purchased pursuant to § 51.307 of this chapter nor wholesale service purchased pursuant to section 251(c)(4) of the Act will receive the full amount of universal service support previously provided to the incumbent local exchange carrier for that customer. The amount of universal service support provided to such incumbent local exchange carrier shall be reduced by an amount equal to the amount provided to such competitive eligible telecommunications carrier.

(b) In order to receive support pursuant to this subpart, a competitive eligible telecommunications carrier must
